

**Shilpa Elizabeth Raju**

**A-levels Studied: Physics,  
Chemistry and Biology**

**University Attending:**

**University of East London**

**Degree Studying:**

**Pharmaceutical Science**

“... My university provides a variety of different clubs that suit your interests. There are a wide range of clubs - including cultural, religious and other interests like cooking and sport. Furthermore there are study clubs and mentors; you can be a mentor if you wish or you can have a personal mentor who can help you with the subject you are struggling with.

My university has plenty of facilities for sport – in addition there are numerous events and tournaments and you are updated with the latest events if you have joined any of the sports clubs.

My university has three campuses and the student accommodation has a great view as it is very near the Thames.

The professors and tutors are very friendly and are always happy to help.

So far, I am having a great experience ...”
